

Remote Learning Grid - Week 8 Term 3 – YEAR 6

This grid covers both online and offline options. Activities that are highlighted yellow will receive explicit feedback from teachers. Optional activities are highlighted in green. Students working online with Google Classroom will also be monitored every second day to ensure that work is being completed. If work is not completed parents will be contacted via Class Dojo. Feedback on activities will be provided in school hours only.

Learning Intention:

We are learning strategies to spell familiar and unfamiliar words.

Success Criteria

- I can identify the focus sound of the week in unfamiliar words.
- I can correctly spell my list words when typing

FUN WITH FONTS

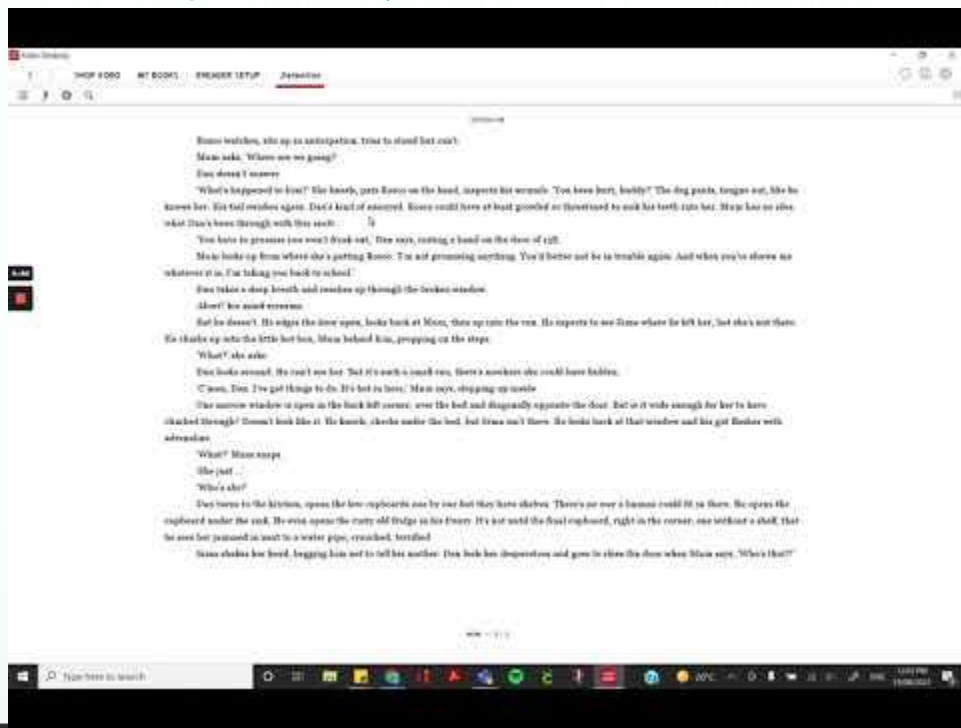

Type your spelling words using different fonts.

Detention

Week 8

Monday - Chapter 29 Youtube link

Monday - Chapter 29

DAN'S MORAL DILEMMA

A moral dilemma is a situation in which a person is torn between right and wrong. The choice the person makes may leave them feeling burdened, guilty or relieved.

Read this excerpt from Ch.29 and answer the questions in complete sentences and paragraphs. Use the next slide for additional

If he tells Mum she'll lose it. But if he doesn't tell her, how will he ever get Sima out of here? He needs help. They have less than an hour till the bus goes. And then there's the cop car that went out by the front. It won't be long till they come looking. He either lets Mum take him back to school and leave Sima or he tells her. Dan says nothing as he walks towards 13B knowing he's doing the wrong thing but doing it anyway.... Betrayal. That's what she'll feel.

- 1. As readers, this is the first time we meet Dan's mum. What do we know about her that might influence our perspective of her and how we think she is likely to react?**
- 2. Dan faces a moral dilemma. Do you think he makes the right 'choice' telling his mum about Sima although he thinks he's done the wrong thing and feels guilty? Why/Why not?**
- 3. How do you think Dan's mum will react to seeing Sima?**

Recreating An Old Photo Of Yourself

GIVE THIS TASK A RATING OUT OF FIVE [COLOUR FILL THE STARS]

Find an old photo of yourself from when you were young and attempt to recreate it! Try and take a

Picture of yourself and match the old

photo as close as you can!

- For example:
- .wear the same outfit (or as close as you can get).
- .have the same pose and expression.
- .have the same or similar setting, if not possible, just taking the photo in your house or garden is fine.

EXAMPLE:

Then take a photo comparing your present self to the photo of yourself in the past. Can't wait to see the results!

EXAMPLE:

MULTIPLICATION AND DIVISION

MONDAY

YEAR 6

ORDERING OPERATIONS

For the previous number sentence, you use the order of operations to solve it like this:

$$\begin{aligned} &4 \times 4 + 5 \times 2 \\ &= 16 + 5 \times 2 \\ &= 16 + 10 \\ &= 26 \end{aligned}$$

4×4 is a multiplication operation so it will be calculated first. Division and multiplication rank evenly (go left to right).

Now multiply 5×2 . $5 \times 2 = 10$.

Addition and subtraction rank evenly (go left to right). Add 16 and 10.

The answer is 26.

|| Screencastify - Screen Video Recorder is sharing your screen. Stop sharing Hide

Learning Intention

We are learning to explore the use of brackets and the order of operations to write number sentences

Success Criteria

I can:

- Use the term 'operations' to describe collectively the process of addition, subtraction, multiplication and division
- Recognise that the grouping symbols [] and () are used in number sentences to indicate operations that must be performed first
- Apply the order of operations to perform calculations involving mixed operations and grouping symbols, without the use of digital technologies
- Investigate and establish order of operations using real l-life contexts

GLOSSARY

- **brackets []**: used as an override of the order of operations. The equation written within the brackets is calculated after the equation is calculated that is written inside the **parentheses**.
- **estimate**: to make a close guess or approximate answer to a problem
- **grouping symbols**: a set of symbols used to group the parts of a number problem that should be done first. Brackets () are the most common grouping symbol.
- **operations**: the four different methods of solving maths problems; these are addition, subtraction, multiplication and division
- **order of operations**: the order in which operations are completed in a number sentence; the order is division, multiplication, addition and subtraction
- **parentheses ()**: also known as round brackets. Used as an override of the order of operations. The equation that is written within the parentheses is calculated first then the equation inside the brackets.
- **per**: for each; for example, steak is \$15 **per** kilogram
- **product**: the result of two numbers that are multiplied
- **quotient**: the result when one number is divided by another number

ORDERING OPERATIONS

Multiplication

Division

Addition

Subtraction

The term 'operations' refers to four different processes of solving number problems

Look at this number sentence.

$$4 \times 4 + 5 \times 2 =$$

How many answers can you find in this number sentence?

There can only be one correct answer. Which one is correct and why?

ORDERING OPERATIONS

For the previous number sentence, you use the order of operations to solve it like this:

$$4 \times 4 + 5 \times 2$$

$$= 16 + 5 \times 2$$

$$= 16 + 10$$

$$= 26$$

4×4 is a multiplication operation so it will be calculated before addition. Division and multiplication rank evenly (go left to right). 4×4 is 16.

Now multiply 5×2 . $5 \times 2 = 10$.

Addition and subtraction rank evenly (go left to right). Add 16 and 10.

The answer is 26.

ORDER OF OPERATIONS

Here is another example:

$$90 \div 9 - 7$$

$$= 10 - 7$$

$$= 3$$

Divide 90 by 9. Division comes before subtraction in the order of operations. $90 \div 9 = 10$.

Subtraction is next in the order of operations for this problem.
 $10 - 7 = 3$.

The answer is 3.

ORDERING OPERATIONS

Try these number sentences using the order of operations. Show your working.

$$10 + 6 - 7$$

$$3 \times 3 + 2$$

$$45 \div 9 + 7$$

$$10 + 2 \times 4 + 3$$

$$5 + 40 \div 8 + 23$$

$$89 - 8 \times 9 + 6$$

ORDERING OPERATIONS

Now write the number sentence to match the word problem. Then use the order of operations to solve these word problems. The first one has been done for you.

Rosa did 35 push-ups every day for 4 days. She then did 40 push-ups each day for the next 5 days. How many push-ups did she do altogether?

$$35 \times 4 + 40 \times 5$$

$$140 + 40 \times 5$$

$$140 + 200$$

340 push-ups

Yesterday I bought lunch for my friends. I bought 4 pork rolls, which cost \$5 each and 6 blueberry muffins which cost \$3 each. What is the total cost?

ORDER OF OPERATIONS

Max saves \$15 per week for 6 weeks. He gets a pay rise at his job and then saves \$18 per week for 3 weeks. How much has Max saved?

Billy's character in his favourite computer game has 150 gold coins. He bought a horse for 90 coins. During the level he entered a tournament, battled 3 opponents and won another 25 coins from each opponent battle. How many gold coins did Billy have at the end of the battle?

GROUPING SYMBOLS

Grouping symbols have a special use in mathematics. Think of them as an override of the order of operations. There are several types of symbols, including brackets [] and parentheses ().

There is a rule to follow when you see grouping symbols in a number sentence.

Rule: Always perform the operation inside the grouping symbol first.

GROUPING SYMBOLS

There are three operations in this number sentence.

$$(4 + 9) \times 10 \div 5$$

$$= 13 \times 10 \div 5$$

$$= 130 \div 5$$

$$= 26$$

Division and multiplication come before addition in the order of operations, but the operations in grouping symbols are always done first, so add 4 to 9. $4 + 9 = 13$

$4 + 9$ is 13. Now you can perform the multiplication and division operations. Work left to right.

The answer is 26.

GROUPING SYMBOLS

If we work from left to right we will add 3 and 6, then 6 and 6

$$(3 + 6) \times (6 + 6)$$

$$= 9 \times 12$$

$$= 108$$

Brackets come first.

The answer is 108.

GROUPING SYMBOLS

Complete these calculations. Don't forget to use the order of operations and **show your working.**

$$15 + (4 \times 7) \div 2$$

$$(2 \times 5) \div (2 + 3)$$

$$6 \times 3 \times 6 \div 3$$

$$19 + (7 \times 3) + 5 + (20 - 6)$$

GROUPING SYMBOLS

Add parentheses () so these number sentences give the answers shown.

$$10 + 12 \times 3 = 66$$

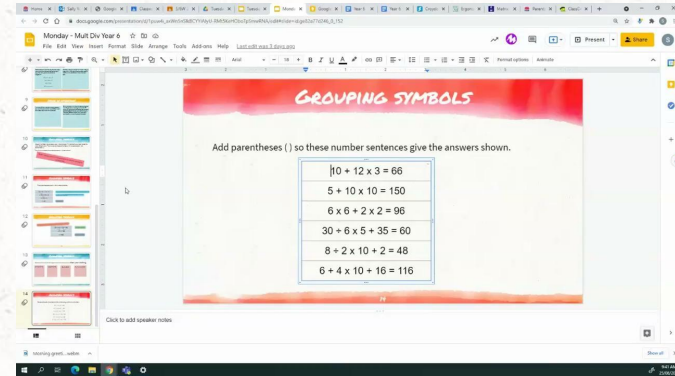

$$5 + 10 \times 10 = 150$$

$$6 \times 6 + 2 \times 2 = 96$$

$$30 \div 6 \times 5 + 35 = 60$$

$$8 \div 2 \times 10 + 2 = 48$$

$$6 + 4 \times 10 + 16 = 116$$

5 MINUTE SKILL CHECK

WEEK 28 SESSION 1

Answer as many questions as you can in 5 minutes

MENTAL STRATEGIES -

do these in your head

Q	Question	Answer
1	$3 + \square = 5$	<input type="text"/>
2	$\square + 32 = 100$	<input type="text"/>
3	What is half of 3?	<input type="text"/>
4	$23 - 10 = \square$	<input type="text"/>
5	$139 + \square = 140$	<input type="text"/>
6	$52 = 42 + \square$	<input type="text"/>

7	$438 - 432 = \square$	
8	$4 \times 7 = 28$, so $28 \div 7 = \square$	
9	What is 13:57 in 12 hour clock format?	
10	What time will it be 51 minutes after 7:13 pm	
Total out of 10		

TIMESTABLES -

do these in your head

Q	Question	Answer
1	$6 \times 4 = \square$	<input type="text"/>
2	$18 \div 9 = \square$	<input type="text"/>
3	$\square \times 3 = 15$	<input type="text"/>
4	$36 \div 6 = \square$	<input type="text"/>
5	$4 \times \square = 24$	<input type="text"/>

6	$8 \times \square = 48$	<input type="text"/>
7	$8 \times 3 = \square$	<input type="text"/>
8	$24 \div \square = 6$	<input type="text"/>
9	$5 \times \square = 25$	<input type="text"/>
10	$15 \div 5 = \square$	<input type="text"/>
Total out of 10		<input type="text"/>

KEY SKILLS - you may use written calculations for these questions

Q	Question	Answer
1	$45 \times 70 = \square$	
2	$1012 - 791$	
3	6.3×4.57	
4	$5/5 = \square \%$	
5	$(-2) \times 4$	
6	Round 8.1434 to 2 decimal places	

7 $8 + (-9)$

8 Round 1915 to 1 s.f.

9 What is the letter at $(0, -2)$?

10 What is $\frac{5}{6}$ of 42?

Total out of 10

Tuesday - Chapter 30 Youtube link

Man looks at Lisa, at Lisa, a deep double-crisis between her brows. She shakes her head. "That is illegal!"
Lisa can hear the pain in her voice. He hates it when she gets panicky.
"What else's done is illegal. You can't just take the law into your own hands!"
But what if the law's wrong? Lisa asks.
It's not up to you to decide.
"Why not?" he asks.
"Because it's up to the police."
"Police?" Lisa questions. "You're always complaining about police. What about when they take down one of the interway entrances and get people for speeding. You go off your brain..."
That's different.
"Or when I've got locked up for that thing with the..."
Lisa? she starts, looking a look to him as though he did doing those months in jail for something he says he didn't do or going to marry a girl who's been locked up for years.
"Maybe, sometimes, but make things worse, not better," he says.
"Well, why don't we let the police and judges decide that rather than a house of ill-fall?"
Lisa looks for the first gesture with respect. If Lisa's mother alerts the police, Lisa will run. "Who did he bring her here? That's what you said. That's what I was right."
You going to have to call someone," Lisa says. "You not having you..."
"Please," Lisa says. And the way she says it with such despair, her eyes suddenly close. She has big eyebrows, makes Lisa stop and think.
"They will send us back home. My mother will be tortured," Lisa says. "Maybe they will murder my friends."
Man looks horrified that this might be true, but also a bit sure, like Lisa might be lying.
There fall down Lisa's cheeks.
Lisa feels the emotion well up at him and he has to turn away so that he doesn't start weeping.
He could never. Lisa's eyes get a bit shiny, too.
"Can we go?" Lisa asks.
Man looks at her for a long moment. You sorry, Lisa. It's not the right thing.
"What?" he blurts. She has a little more, a look. She'll get lost.
Man looks Lisa in the eyes again. Man's face is red and sweaty. She urges her cheeks with the palm of her hand.
"Please, Man."

Tuesday- Chapter 30

DETECTION

Mum looks at Dan, at Sima, a deep double crease between her brows. She shakes her head. 'This is illegal.'

Dan can hear the panic in her voice. He hates it when she gets panicky.

'What she's done is illegal. You can't just take the law into your own hands.'

'But what if the law's wrong?' Dan asks.

'It's not up to you to decide.'

'Why not?' he asks.

'Because it's up to the police.'

'Police?!' Dan questions. 'You're always complaining about police. What about when they hide down near the motorway entrance and get people for speeding. You go off your brain -'

'That's different.'

'Or when Dad got locked up for that thing with the -'

'Dan!' she warns, flicking a look to Sima as though his dad doing three months in jail for something he says he didn't do is going to worry a girl who's been locked up for years.

'Maybe, sometimes, laws make things worse, not better,' he says.

'Well, why don't we let the police and judges decide that rather than a know-it-all kid?'

Sima tenses. Her face gushes with sweat. If Dan's mother alerts the police, Sima will run. Why did he bring her here? *Don't trust anyone.*

That's what Dad said. Maybe he was right.

'I'm going to have to call someone,' Mum says. 'I'm not having you -'

'Please,' Sima says. And the way she says it with such despair, her eyes suddenly shiny, like two big bubbles, makes Mum stop and stare.

'They will send us back home. My mother will be tortured,' Sima says. 'Maybe they will murder my family.'

Mum looks horrified that this might be true, but also a bit suss, like Sima might be lying.

Tears fall down Sima's cheeks.

Dan feels the emotion well up in him and he has to turn away so that he doesn't start howling.

He could swear Mum's eyes get a bit shiny, too.

'Can we go?' Dan asks.

Mum looks at him for a long moment. 'I'm sorry, Dan. It's not the right thing.'

'What?' he blurts. 'She has a little sister, a baby. She'll get hurt.'

Mum looks Sima in the eyes again. Mum's face is red and sweaty. She wipes her cheeks with the palm of her hand.

'Please, Mum.'

Tuesday - Ch 30 - Perspective: Feelings, actions, motivation

Perspective is the way that people look at a situation. There are a number of factors that influence people's perspective such as: previous experiences, beliefs and knowledge of the situation.

Dan and his mum have different perspectives on whether to help Sima. Complete the following 'feelings, actions, motivations table' and reflect on the different perspectives. An example is provided.

	What are they feeling? Use evidence from the text	Actions What did they do? Use evidence from the text	Motivation Why are they feeling this way? Use evidence from the text
Dan's mum	1. Example: Panicked	States 'What's she's done is illegal'	Says 'It's up to the police'. Is nervous about police. Dan's dad has been in jail. She doesn't trust police
Dan's mum	2.		

Perspective: Feelings, actions, motivation

	What are they feeling? Use evidence from the text	Actions What did they do? Use evidence from the text	Motivation Why are they feeling this way? Use evidence from the text
Dan	1.		
Dan	2.		

WHAT DO YOU THINK?

Do you think Dan's mum will help Sima? Why/Why not?

GROUPING SYMBOLS INSIDE GROUPING SYMBOLS

You have learnt how grouping symbols affect the order of operations.

But what can you do if there are grouping symbols inside grouping symbols, such as $[6 + (6 \times 8)] \times 2$?

Answer: Perform the operation in the innermost grouping symbol first. Once you have performed that operation, write the answer in the same place. The grouping symbols for that operation are then cancelled. Next, work your way outward to the next operation enclosed by grouping symbols

Learning Intention

We are learning to explore the use of brackets and the order of operations to write number sentences

Success Criteria

I can:

- ✓ Use the term 'operations' to describe collectively the process of addition, subtraction, multiplication and division
- ✓ Recognise that the grouping symbols [] and () are used in number sentences to indicate operations that must be performed first
- Apply the order of operations to perform calculations involving mixed operations and grouping symbols, without the use of digital technologies
- Investigate and establish order of operations using real l-life contexts

GROUPING SYMBOLS INSIDE GROUPING SYMBOLS

You have learnt how grouping symbols affect the order of operations.

But what can you do if there are grouping symbols inside grouping symbols, such as $[6 + (6 \times 8)] \times 2$?

Answer: Perform the operation in the innermost grouping symbol first. Once you have performed that operation, write the answer in the same place. The grouping symbols for that operation are then cancelled. Next, work your way outward to the next operation enclosed by grouping symbols

GROUPING SYMBOLS INSIDE GROUPING SYMBOLS

$$[6 + (6 \times 8)] \times 2$$

$$= [6 + 48] \times 2$$

$$= 54 \times 2$$

$$= 108$$

Perform the operation in the innermost grouping symbols first: $6 \times 8 = 48$.

Cancel the brackets for that operation. Now perform the next operations in brackets: $6 + 48$

$6 + 48 = 54$. Multiplication is the only operation left.

The answer is 108.

GROUPING SYMBOLS INSIDE GROUPING SYMBOLS

$$[24 - (14 + 3)] + 6 \times 10$$

$$= [24 - 17] + 6 \times 10$$

$$= 7 + 6 \times 10$$

$$= 7 + 60$$

$$= 67$$

Perform the operation in the innermost grouping first: $14 + 3$

$14 + 3 = 17$. Cancel the brackets for that operation. Now perform the next operations in brackets: $24 - 17$

$24 - 17 = 7$. Multiplication is before addition in the order of operations so $6 \times 10 = 60$

$6 \times 10 = 60$. Addition is the only operation left. So $7 + 60 = 67$.

The answer is 67.

GROUPING SYMBOLS INSIDE GROUPING SYMBOLS

$$9 \times [(6 + 3) \times 7]$$

$$[(7 + 2) \times 20] \div 18$$

$$5 \times [(2 \times 24) + 2]$$

$$13 + [(23 + 5) \div 4]$$

$$[(6 + 6) \times (9 - 6)] + 20$$

$$30 + [(5 \times 5) + 20 \div 10]$$

GROUPING SYMBOLS INSIDE GROUPING SYMBOLS

Try these number sentences using the order of operations. Show your working.

$$3 + [20 \div (9 - 5)]$$

$$(16 + 4) + [40 \times (10 - 7)]$$

$$12 + 25 \div [5 \times (25 - 24)]$$

GROUPING SYMBOLS INSIDE GROUPING SYMBOLS

Write a number sentence with grouping symbols, using the numbers given for each question, then show how to solve it.

16	2	7	10

23	9	21	13	6

GROUPING SYMBOLS

GROUPING SYMBOLS

Complete the 2 number sentences below. Show your working. Remember, work left to right when addition and subtraction are in the same number sentence, except when grouping symbols are used.

$15 - (5 + 7) =$	

$15 - 5 + 7 =$	

Did the brackets make any difference to the way you calculated the number sentence?

Why? Why not?

GROUPING SYMBOLS

Complete these 2 number sentences. Show your working. Before you start, look at both number sentences and think about this question.

Do you think the brackets will make a difference to the outcomes of the number sentences?

$32 + (2 \times 4) =$	

$32 + 2 \times 4 =$	

Did the brackets make any difference to the way you calculated the number sentence?

Why? Why not?

Click and drag the tick into the circle if the number sentence requires grouping symbols. If it doesn't, leave the tick out. Then calculate the answers.

$9 + (6 \times 6)$

$10 - (4 \div 2)$

$(14 - 5) \times 7$

$(20 \times 5) \div 5$

$20 \times (5 \times 5)$

$13 + (27 \times 0)$

$50 + (14 + 4) - 10$

$(14 \div 7) + (60 \div 10)$

$51 + 81 \div (9 \div 3)$

WORD PROBLEMS

When solving word problems, it is helpful to write them as number sentences. This makes them easier to solve. Read this word problem. While you are reading it, try to think how you would use the numbers in a number sentence to solve the problem.

Molly bought 16 lollies and shared them equally with her brother. Her friend Lisa gave her 6 more lollies. How many lollies does Molly have left?

To write this as a number sentence, we need to use the numbers from the problem. The numbers we use are 16, 2 and 6.

\div $+$ 16 2 6 =

\times $-$

Choose which operation symbol to use to show this word problem as a number sentence, then solve it.

Click and drag the operation symbol into place

WORD PROBLEMS

What about this example:

Molly bought 16 lollies and gave 6 lollies to Lisa. She shared the rest equally with her brother. How many lollies does Molly have left?

This problem uses the same numbers but different operations.

$$\begin{array}{c} \div \\ \times \end{array} \quad \begin{array}{c} + \\ - \end{array} \quad 16 \quad \square \quad 6 \quad \square \quad 2 = \square$$

Click and drag the operation symbol into place

WORD PROBLEMS

Did you get $16 - 6 \div 2 = 13$

If we solve this using the order of operations, we would divide 6 by 2 to make 3. We then subtract 3 from 16, leaving Molly with 13 lollies.

This isn't correct. Why?

Molly gave Lisa 6 lollies **before** dividing the remaining lollies by 2. This means that the subtraction **must be performed first** and to do that we have to use grouping symbols. Add grouping symbols and solve it again.

÷ +
× -

$$16 \quad \square \quad 6 \quad \square \quad 2 = \square$$

()

Click and drag into place

WORD PROBLEMS

When solving word problems, it is helpful to write them as number sentences. This makes them easier to solve. Read this word problem. While you are reading it, try to think how you would use the numbers in a number sentence to solve the problem.

Molly bought 16 lollies and shared them equally with her brother. Her friend Lisa gave her 6 more lollies. How many lollies does Molly have left?

To write this as a number sentence, we need to use the numbers from the problem. The numbers we use are 16, 2 and 6.

\div $+$ 16 2 6 =

\times $-$

Choose which operation symbol to use to show this word problem as a number sentence, then solve it.

Click and drag the operation symbol into place

WORD PROBLEMS

The local garden centre has a sale. If Mr Lucan buys 4 tomato plants, he gets 2 free. For 10 days, Mr lucan buys 4 tomato plants each day. He then shares them equally among 5 households in his street. How many tomato plants will each household receive? number

Detention

Week 8

Wednesday - Chapter 31 Youtube link

Wednesday - Chapter 31

Wednesday - Chapter 31

A major theme in Detention is 'Opportunity and Privilege'.

Reflect on the following points:

- *By virtue of being born in Australia, we are privileged and have opportunities that others do not. Thinking about the privileges and opportunities we have compared to others helps us to have empathy for others and to take into account how our own biases and worldviews may affect our views.*
- *The Latin phrase "Noblesse Oblige" suggests that if you are a lucky person with a fortunate life you should try to understand what it's like for other people who might not be so lucky.'*

Answer the questions on the following slide.

THEME – OPPORTUNITY & PRIVILEGE

Answer the questions in complete sentences. Use the additional slide for extra space.

1. What does privilege look like? What different forms might it take?
2. Dan's mum mentions privilege:

'If you've got money in this city your rights are protected and if you don't it's tough.'

What do you think she means by that? Do you agree with her comment?

3. Think about Noblesse Oblige. What should those who have, do about other children like Sima who are otherwise stuck in their countries of origin?

The background features a white central area with colorful, abstract shapes. On the left, there are yellow and purple wavy bands. On the right, a purple shape contains a grid of white dots, and a yellow shape has a red circle. At the bottom, a teal wavy band contains a row of white dots.

Science
Week 8
Wednesday

Which forces were used in medieval battles?

1

The longbow was a deadly weapon on the battlefields of medieval Europe. A good archer could fire an arrow at a speed of 50 metres per second. Where does the force needed to produce this speed come from? Discuss some ideas with a partner, and then share them with the class.

Vocabulary

Use a dictionary to write the definitions of each of the above words.

Word

Definition

Word	Definition

Look at the image of the medieval catapult

What do you think this was used for?

How might this catapult work?

What type of force do you think is being used in the video below?

THE CATAPULT

Answer here, using full sentences

Catapults use tension force

Tension force

- Tension is the pulling force that can be transferred along the length of a rope or cable when it is pulled tight.
- The catapult was used in medieval battles to launch large rocks at castle walls. The rock was placed in the spoon-shaped 'bucket' on the end of the arm, and the rope on the end was wound down around an axle. This put both the rope and the wood 'under tension'.
- When the rope was released, the arm shot upwards, launching the rock before being stopped by the cross bar.

What type of force do you think is being used in the video below?

Answer here, using full sentences

The marshmallow catapult uses elastic force

Elastic force

The second marshmallow catapult is different from the first as it uses 'elastic force'. (The first uses tension force.)

- Elastic materials are ones that return to their original shape when stretched (pulled out) or compressed (pushed in). The elastic force is the force of resistance to the change in shape. The more the material is stretched or compressed, the greater the elastic force.

Week 8

Thursday - Chapter 32 Youtube link

She's body slams with the bits of sea and her head. Her neck, chin and face gives with softly reflected light. The sea used to be, dead still, dead quiet.

They feel the rock and roll movement of the effort being captured down again and that is the sea beneath them.

She swears the effort will see the brick open, make her feel that she said. Day sea on the reef and start popping it with water. She comes whole pouring her this, coming right through her chest and out her back. Don't let capture, she fights. This is it. If she could see right now, give her eyes, could she see it? Or could she see it? Or could she see it? Or could she see it?

She can't take the breath but only longer. Even with her face round a line continues off the starting white reef, it reaches her chest and around her thoughts. She has to get up. It's too much. She pushes up off the metal and, from the corner of her eye, she sees the top of the effort's head as the ground below. If she were now there, she would see the sea. And if she were there, they'd see her.

But she has to move. The pain is unbearable. She's never known her like this. Even on Christmas Island, when it was hot and hot all the time, or back home in the desert when it's was a little girl, she has not remember that that prepared her pain and pushed her eye like this.

When she read that and looks. She repeats the words over and over in her head. Like a mantra. *MoreDoDoLo. MoreDoDoLo. MoreDoDoLo.* There's her head and her head. The quiet she and her parents speak. *MoreDoDoLo.* The first things she says when she's in the world.

The next moment might be the closest she comes to capture. Like a death. But the strikes are too high to give so. Seeing her family might be the reward for holding her own, and knowing that makes the air of pain of the last fight to hold. Don't tell her that you can't see it and that you can't see it. The sea has been there when they were waiting and waiting for a whole year in hell for their application to be processed by Australia. Immigration.

Thursday- Chapter 32

Moral Dilemma - Just doing their job!

Answer the questions in complete paragraphs.

Sima doesn't blame the officers for doing their job.

These officers are just doing their job. And their job is to throw her back into detention, lock her up, even though she's a child, even though she'll be sent home and even bad things might happen to her tomorrow or in a week's time. But if everybody just does their job without thinking, people suffer. They may even die.

1. What is the author's perspective? What is he challenging you as a reader to question?

2. Do you think the officers are making a 'morally' correct decision carrying out their 'job'?

3. Do you think their opinion of Sima would be different if they actually knew why she is a refugee and what her family had been through?

WEEK 28

SESSION 4

Answer as many questions as you can in 5 minutes

MENTAL STRATEGIES -

do these in your head

Q	Question	Answer
1	$5 = \square + 4$	<input type="text"/>
2	$\square + 81 = 100$	<input type="text"/>
3	What is half of 3?	<input type="text"/>
4	$28 - 10 = \square$	<input type="text"/>
5	$93 + \square = 100$	<input type="text"/>
6	$175 = 105 + \square$	<input type="text"/>

7	$2219 - 2212 =$ \square	<input type="text"/>
8	$6 \times 7 = 42$, so $42 \div 7 = \square$	<input type="text"/>
9	What is 2:28 am in 24 hour clock format?	<input type="text"/>
10	From 8:29 pm, how many minutes until 9:24 pm?	<input type="text"/>
Total out of 10		<input type="text"/>

TIMESTABLES -

do these in your head

Q	Question	Answer
1	$30 \div \square = 5$	<input type="text"/>
2	$9 \times \square = 72$	<input type="text"/>
3	$5 \times \square = 25$	<input type="text"/>
4	$60 \div 6 = \square$	<input type="text"/>
5	$16 \div \square = 4$	<input type="text"/>

6	$24 \div \square = 3$	<input type="text"/>
7	$16 \div \square = 2$	<input type="text"/>
8	$20 \div 4 = \square$	<input type="text"/>
9	$40 \div \square = 8$	<input type="text"/>
10	$40 \div 5 = \square$	<input type="text"/>
Total out of 10		<input type="text"/>

KEY SKILLS - you may use written calculations for these questions

Q	Question	Answer
1	$40 \times 47 = \square$	<input type="text"/>
2	$13043 - 7312$	<input type="text"/>
3	9×3.47	<input type="text"/>
4	$2/4 = \square \%$	<input type="text"/>
5	$(-7) \times 3$	<input type="text"/>
6	Round 22.3996 to 3 decimal places	<input type="text"/>

7 $(-2) + (-1)$

8 Round 6.3674 to 3 s.f.

9 What is the letter at (1,0)?

10 What is $\frac{8}{10}$ of 80?

Total out of 10

Week 28 Session 4

Mental Strategies Answers

Q	Question	Answer
1	$5 = \square + 4$	1
2	$\square + 81 = 100$	19
3	What is half of 3?	1.5
4	$28 - 10 = \square$	18
5	$93 + \square = 100$	7
6	$175 = 105 + \square$	70
7	$2219 - 2212 = \square$	7
8	$6 \times 7 = 42$, so $42 \div 7 = \square$	6
9	What is 2:28 am in <u>24 hour</u> clock format?	02:28
10	From 8:29 pm, how many minutes until 9:24 pm?	55

Week 28 Session 4

Times tables Answers

Q	Question	Answer
1	$30 \div \square = 5$	6
2	$9 \times \square = 72$	8
3	$5 \times \square = 25$	5
4	$60 \div 6 = \square$	10
5	$16 \div \square = 4$	4
6	$24 \div \square = 3$	8
7	$16 \div \square = 2$	8
8	$20 \div 4 = \square$	5
9	$40 \div \square = 8$	5
10	$40 \div 5 = \square$	8

Week 28 Session 4

Key Skills Answers

Q	Question	Answer
1	$40 \times 47 = \square$	1880
2	$13043 - 7312$	5731
3	9×3.47	31.23
4	$2/4 = \square \%$	50
5	$(-7) \times 3$	-21
6	Round 22.3996 to 3 decimal places	<u>22.400</u>
7	$(-2) + (-1)$	-3
8	Round 6.3674 to 3 s.f.	6.37
9	What is the letter at (1,0)?	N
10	What is 8/10 of 80?	64

BTN

SUMMARY

TASK: Watch BTN Episode for this week.

Write a summary about your favourite story.

Summarising

- What was the text about?
- Who was in the story?
- Where did the story take place?
- What was the author's purpose?
- What is the main message or moral of this text?
- Was there a problem to be resolved in the text?
- How was the problem resolved?
- What are some keywords or key phrases from the text?
- How have your feelings about the topic changed?
- Were you surprised by the ending? Why? Why not?
- Did you enjoy the piece? Why? Why Not?
- How would you describe this text to another person?

CHALLENGE

Week 8 - Friday

CHALLENGE 1

$$\begin{array}{l} \text{burger} \times \text{burger} \times \text{burger} = \text{taco} \\ \text{pizza} \times \text{pizza} \times \text{pizza} = 27 \\ \text{pizza} \times \text{burger} \times \text{pizza} = 18 \\ \text{taco} + \text{taco} + \text{taco} = ? \end{array}$$

Answer:

CHALLENGE 2

$$\begin{array}{l} \text{Boy on skateboard} + \text{Boy on skateboard} + \text{Boy on skateboard} = 36 \\ \text{Basketball} \times \text{Basketball} \times \text{Basketball} = 27 \\ \text{Boy walking} + \text{Boy walking} + \text{Basketball} = 13 \\ \text{Basketball} + \text{Boy on skateboard} \times \text{Boy walking} = ? \end{array}$$

Answer:

CHALLENGE 3

$$\text{Sad Face} + \text{Sad Face} + \text{Sad Face} = 9$$

$$\text{Sad Face} + \text{Grinning Face} + \text{Sad Face} = 15$$

$$\text{Grinning Face} + \text{Sad Face} + \text{Grinning Face} = 28$$

$$\text{Sad Face} + \text{Sad Face} \times \text{Grinning Face} = ?$$

Answer:

CHALLENGE 4

$$\begin{aligned} & \text{Football} + \text{Football} + \text{Football} = 30 \\ & \text{Baseball} \times \text{Baseball} + \text{Football} = 35 \\ & \text{Softball} \times \text{Softball} + \text{Football} = 26 \\ & \text{Baseball} + \text{Softball} \times \text{Tennis Ball} + \text{Football} = 23 \\ & \text{Tennis Ball} = ?? \end{aligned}$$

Answer:

CHALLENGE 5

$$36 = \text{Mario} + \text{Princess Peach} + \text{Mario}$$

$$\text{Toad} \times \text{Bowser} = 0$$

$$\text{Mario} \div \text{Toad} = 2$$

$$\text{Mario} = \text{Princess Peach}$$

$$\text{Mario} + \text{Bowser} + \text{Princess Peach} + \text{Toad} = \text{Question Block}$$

Answer:

ESCAPE ROOM

Can you complete the 4 tasks to help our school escape lockdown?

EMERGENCY PROTOCOL ACTIVATED!

The school security system has malfunctioned and now **everyone is locked in!**

The only way to bypass the school's emergency protocol is to follow the clues and find the 4 security codes.

The whole school is relying on you, so make sure you read all the instructions carefully and work together as a team!

LET'S GET STARTED!

1. In this online file, you will have all of the instructions and puzzles needed to uncover 4 secret codes. Type your answers onto the slides, or move the numbers provided, so you can keep track of your answers
2. Read all instructions carefully to solve the problems accurately and uncover the correct code
3. When you finish a task, the code must be typed into a Google Form you can access here:
<https://forms.gle/AZ87LZATrpE8aTb37>
4. If your code is incorrect you will be prompted to 'try again'. If your code is correct, continue to the next task!

TASK ONE

Supplies needed:

- ✓ Task 1 answer sheet
- ✓ Task 1 cards

Directions:

1. Solve the multiplication problems on each card
2. Move the squares and order them on the grid by matching the multiplication clues
3. Record the letters on the code line, from left to right and top to bottom
4. Type your code (in capitals) into the Google Form with no spaces. If the code is correct, progress to the next task.

TASK ONE ANSWER SHEET

$12 \times 4 =$

$12 \times 4 =$

--

--

--

--

$33 \times 3 =$
L
 $12 \times 2 =$

--

--

--

--

$4 \times 9 =$
Q

$5 =$

$9 \times 8 =$

$3 \times$

$=$

$14 \times$

$=$

TASK TWO

Supplies needed:

- ✓ Task 2 question sheet

Directions:

1. Find the 3 missing numbers
2. Numbers on the edge of the triangle are created by multiplying the corner numbers
3. Type the number sequence (in ABC order) into the Google Form with no spaces. If the code is correct, progress to the next task.

TASK TWO QUESTION SHEET

CODE: ? ? ? ?

TASK THREE

Supplies needed:

- ✓ Task 3 question sheet

Directions:

1. Solve all multiplication algorithms on the question sheet
2. Add all digits of each answer, one at a time, then record this number on the code line below. Do this for all questions
3. Type your code into the Google Form with no spaces. If the code is correct, progress to the next task.

TASK THREE QUESTION SHEET

$$\begin{array}{r} 1. \quad 453 \\ \times 32 \\ \hline \end{array}$$

Type here

$$\begin{array}{r} 2. \quad 790 \\ \times 47 \\ \hline \end{array}$$

Type here

$$\begin{array}{r} 3. \quad 346 \\ \times 85 \\ \hline \end{array}$$

Type here

$$\begin{array}{r} 4. \quad 801 \\ \times 49 \\ \hline \end{array}$$

Type here

$$\begin{array}{r} 5. \quad 623 \\ \times 99 \\ \hline \end{array}$$

Type here

$$\begin{array}{r} 6. \quad 714 \\ \times 35 \\ \hline \end{array}$$
